DEVELOPMENT EXPERIENCE

General Assembly – Jr. Full-Stack Web Developer

Dec 2015 – Mar 2016

A full-time, intensive program in full-stack web application development through project-based learning.

MeBooks – <https://mebooks.herokuapp.com>

- Created a Single-Page Application using the MEAN stack to allow users to customize cartoon characters

Giftr – app-giftr.herokuapp.com

- Utilized MongoDB search queries based on user input to recommend gifts to users
- Responsible for the majority of front-end design and search query creation

Top Tracks - <https://toptracks.herokuapp.com>

- Created a Rails application and defined the MVC for users and tracks using ActiveRecord
- Implemented Paperclip, allowing users to upload image and audio files to an AWS S3 bucket
- Wrote JavaScript code to control audio elements such as play, pause, and restart

Wheel of WDI - wheel-of-wdi.bitballoon.com

- Recreated the game show Wheel of Fortune using HTML5, CSS3, and jQuery
- Utilized responsive web design techniques to allow users to play on a variety of mobile devices

Gearbox Solutions - Database Developer

Apr 2015 – Oct 2015

- Designed user interfaces for multiple client projects using the Balsamiq mockups tool
- Developed the database architecture for new projects as well as maintained legacy database solutions

Modality Media Group - Freelance Web Developer

Jan 2015 – Apr 2015

- Utilized HTML5, CSS3, JavaScript and PHP to customize WordPress websites according to client specifications

PROFESSIONAL EXPERIENCE

Porter Keadle Moore - IT Auditor

Jun 2014- Dec 2014

- Increased social engineering conversions 25% by using Chrome developer tools to replicate the client's website

Contour Engineering - Accounts Payable Clerk (Internship)

May 2013- Aug 2013

- Developed a VBA Macro that decreased the effort to run employee time reports from two hours to ten minutes

Macy's - Sign & Price Analyst

Jun 2011-Aug 2012
